

PAROMITA DAS

AI SOLUTIONS | DATA SCIENCE & ADVANCED ANALYTICS | BUSINESS STRATEGY

Medford, MA | (419) 212-5299 | dasparomita1984@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#) | U.S. Permanent Resident

PROFESSIONAL SUMMARY

Advanced Analytics & AI leader with 10+ years of experience building GenAI-enabled workflows, AI agents, and LLM-assisted decision systems using Python, SQL, LangChain, RAG, prompt engineering, and LLM evaluation. Leads enterprise analytics and AI solutions for a digital subscription business generating \$100M+ annually and reaching 10M+ monthly users, scaling AI-powered product intelligence across 200+ categories through automated data pipelines and reusable analytics workflows. Built AI-ready frameworks connecting customer behavior, product performance, and business KPIs; launched an Analytics QA function that grew into a 20+ member team; and delivered approximately \$500K in inventory savings and a 40% reduction in manual data preparation through governed AI-enabled workflows.

SKILLS

Data Science & AI: Python, SQL, R, Regression, Random Forest, K-Means, NLP, GenAI/LLMs, LangChain, Prompt Engineering, AI Agents, RAG, Vector Databases, Embeddings, LLM Evaluation, Custom AI Skills

Analytics & Strategy: KPI frameworks, Forecasting, Experimentation, Segmentation, Cohort Analysis, Conversion Optimization, Retention, Churn Analysis, LTV, Executive Storytelling

Platforms: Tableau, Power BI, Snowflake, Databricks, Adobe Analytics, GA4, Streamlit, GitHub, Jupyter, VS Code

EXPERIENCE

Consumer Reports | Yonkers, NY Jun 2022 - Present

Senior Manager, Business Analytics

- Lead analysts, data scientists, and global consultants in delivering enterprise analytics and AI solutions; translate product, customer, and growth priorities into KPI frameworks, measurement strategies, automated decision systems, and executive recommendations. Leads enterprise analytics and AI solutions for a digital subscription business generating \$100M+ annually and reaching 10M+ monthly users.
- Build governed GenAI workflows, AI agents, and custom analytics skills using Python, SQL, LangChain, prompt engineering, RAG, embeddings, vector databases, and LLM evaluation, reducing manual data preparation and research effort by approximately 40%.
- Architect automated data and KPI workflows using Snowflake, Databricks, Tableau, and Power BI, scaling product intelligence across 200+ categories, social platforms, and the CR Ratings app.
- Supported CR Recommended licensing growth through AI-ready measurement strategy, customer intelligence, and executive storytelling, contributing \$5M+ in revenue and earning the “2022 Smashing Success” Award.
- Led customer journey analytics and experimentation across homepage, paywall, subscription funnel, and member experiences, using SQL, Python, and LTV, retention, and churn analysis to identify high-value audiences and personalize conversion strategies; optimized a non-member journey that increased paid subscriptions by 12%.
- Developed an LLM-based voice-of-customer workflow using NLP, sentiment analysis, prompt engineering, and thematic classification to identify consumer pain points and prioritize improvements to the CR Ratings app.

Consumer Reports | Yonkers, NY Oct 2019 - May 2022

Manager, Business Analytics

- Developed multivariate time-series models for subscription-revenue forecasting in Python, R, and Jupyter, applying feature engineering, feature selection, and time-aware validation across regression, Random Forest, and XGBoost models; improved forecast accuracy by 25%.
- Built and validated an audience-segmentation model using RFM features and K-Means clustering, applying feature normalization, elbow analysis, silhouette scoring, and business profiling to optimize cluster selection; combined cohort, LTV, retention, churn, and customer-journey analysis to develop targeted strategies that increased subscription rates by 20%.
- Developed a weighted, multidimensional content-scoring model using feature normalization and composite-index methodology to integrate engagement, conversion, audience, and business-performance signals, enabling portfolio prioritization and content-optimization decisions.

American Airlines | Tulsa, OK May 2019 - Aug 2019

Supply Chain Analytics Intern

- Developed a data-driven inventory optimization model using five years of demand, purchasing, lead-time, cost, and supplier data; recommended a continuous-review policy for high-value aircraft-engine components, delivering approximately \$500K in savings and earning the “Above & Beyond” Award.
- Built a SQL and Tableau supplier-performance model integrating quality, defects, price, fulfillment, and lead-time KPIs to improve sourcing visibility and identify performance deterioration.

Analytics & Strategy Consultant | St. Louis, MO Sep 2015 - May 2017

Independent Consultant

- Delivered market intelligence, SEO analytics, competitive analysis, KPI frameworks, and measurement roadmaps for travel, lifestyle, healthcare, and local-business clients; used data-driven recommendations to contribute to approximately 30% organic traffic growth for a digital platform.

Time Inc. India | Bangalore, India Sep 2010 - Jun 2015

Assistant Manager / Senior Analyst / Analyst

- Progressed through three roles while leading audience, product, content, and marketing analytics for 17 digital brands reaching 30M+ monthly users; analyzed Adobe Analytics, Comscore, Nielsen, search, social, email, and referral data to guide acquisition, engagement, monetization, and content strategy.
- Launched the India office’s first Analytics QA function, establishing data-validation standards, metric documentation, training, and governance practices that expanded into a 20+ member analytics team and later informed my approach to governed data science and AI solutions.

Tata Consultancy Services - Unilever | Bangalore, India Jan 2009 - Aug 2010

Senior Process Associate

- Analyzed U.S. retail sales and Nielsen consumer data across food and personal-care brands, evaluating category trends, pricing, promotions, and shopper behavior; served as an analytics SME and trainer and received the 2009 Star Performer Award.

SELECTED PROJECTS

[Marketing Analytics Copilot \(Live Demo\)](#): Python/Streamlit platform combining MMM, multi-touch attribution, experimentation, and budget simulation to support marketing decisions, budget allocation, and client-ready reporting.

[Executive Analytics Intelligence](#): AI/Streamlit KPI and briefing platform that helps leaders identify cross-functional trends, risks, and recommended actions.

[Customer Growth Intelligence](#): RFM, market basket, and next-best-product engine that identified approximately £1M in customer growth opportunities.

[Personalization Engine](#): Segmentation and predictive modeling solution that improved click-prediction AUC from 0.57 to 0.69 to support more effective content targeting.

[Opioid Risk Prediction](#): Healthcare risk models achieving AUC 0.89 to support early identification and intervention for high-risk patients.

EDUCATION

MS, Business Analytics — University of Tulsa, Tulsa, OK, USA (2019)

PGDM/MBA, Finance — IFIM Business School, Bangalore, India (2009)

BSc, Biotechnology — Bangalore University, Bangalore, India (2006)

CERTIFICATIONS

Introduction to Model Context Protocol — Anthropic (2026)

Automate Workflows with Generative AI — LinkedIn Learning (2026)

Prompt Engineering for ChatGPT — Vanderbilt University (2025)

Python for Data Science — edX (2019)

SQL for Data Science — DataCamp (2019)

Introduction to Computer Science I — Saylor University (2018)

Project Management Workshop — PMWares (2014)
