Experience

Consumer Reports – Yonkers, NY

Oct 2019 – Present | Senior Manager / Manager

Lead cross-functional analytics engagements across Product, Marketing, Editorial, Membership, Licensing, and Data Engineering, partnering with senior leaders to solve complex business problems and deliver strategic recommendations through analytics.

- Established enterprise KPI frameworks, executive dashboards, and forecasting models that enabled leadership to monitor business performance, prioritize investments, and identify growth opportunities across the organization.
- Developed enterprise KPI dashboards and performance monitoring frameworks for the product testing organization across 200+ product categories, improving operational visibility for the product testers.
- Designed and scaled an enterprise Content Score model integrating revenue, engagement, and behavioral signals to prioritize editorial investments and improve portfolio performance.
- Partnered with marketing leadership to develop measurement frameworks and executive reporting for a year-long \$3M brand campaign, enabling ongoing performance evaluation and optimization.
- Partnered with Product, Engineering, and Data Engineering teams to define business requirements, validate data models, improve data accessibility, and design scalable analytics solutions, including A/B testing frameworks that informed product strategy and investment decisions.
- Developed predictive models, customer segmentation, behavioral analytics, and personalization strategies to improve customer engagement, long-term customer value, and executive decision-making.
- Applied NLP and text analytics to customer feedback and app reviews to identify recurring product issues, quantify customer sentiment, and prioritize product enhancements.
- Introduced AI-enabled analytics workflows using custom GPTs and enterprise data, reducing recurring reporting effort by approximately 40% while accelerating competitive intelligence and executive insight generation.

Award: Recognized with the Smashing Success Award (2022) for analytics leadership supporting the launch and growth of the CR Recommended licensing program, a strategic revenue initiative.

American Airlines – Tulsa, OK

May 2019 – Aug 2019 | Supply Chain Intern

- Built sourcing and forecasting models to support engine inventory planning and supplier decisions.
- Improved RFP analysis and supplier reporting processes.

Award: Received the Above & Beyond Award (2019) for delivering high-impact analytics during my Supply Chain internship, including sourcing optimization and inventory forecasting initiatives.

The BALSA Group – St. Louis, MO

Sep 2015 – May 2017 | Consulting Associate (Pro Bono)

- Supported consulting engagements through market research, competitive analysis, and strategic recommendations for local businesses.
- Delivered actionable recommendations while preparing for graduate studies (GMAT & MSBA).

Time Inc. India – Bangalore, India

Sep 2010 – Jun 2015 | Assistant Manager / Senior Analyst / Analyst

Promoted from Analyst to Assistant Manager within five years, leading analytics across 17 digital media brands serving over 30 million monthly users.

- Led audience and digital analytics across 17 media brands serving more than 30 million monthly users, delivering insights that informed editorial strategy, audience growth, customer engagement, and digital revenue optimization.
- Managed and mentored a team of 4 analysts, partnering with Editorial, Marketing, Product, and business stakeholders to deliver executive reporting, customer insights, and data-driven recommendations.
- Established and led the organization's first Analytics Quality Assurance (QA) function, building a dedicated team responsible for enterprise-wide data quality across the entire Time Inc. magazine portfolio, including analytics supporting a multi-million-dollar advertising revenue business.
- Applied customer segmentation, behavioral analytics, SEO analysis, newsletter analytics, campaign measurement, and audience insights to improve acquisition, engagement, retention, and content performance across digital properties.

Award: Recognized with the Employee of the Quarter Award (Q3 2013) for building the Analytics QA function and improving enterprise reporting quality.

Tata Consultancy Services – Bangalore, India

Jan 2009 – Aug 2010 | Senior Process Associate

- Delivered analytics for Unilever (U.S.), leveraging Point-of-Sale (POS) data, Nielsen market intelligence, and consumer analytics to evaluate brand, category, pricing, promotion, and market performance.
- Served as a Subject Matter Expert (SME), mentoring junior analysts and supporting training, knowledge transfer, and quality improvement initiatives.

Award: Received the Star Performer Award (2009) for driving process improvements and delivering high-quality analytics solutions for Unilever's global business.

Notable Projects

- **Customer Growth Intelligence & Recommendation Engine ([GitHub](#)):** Built an end-to-end customer analytics platform using Python, Streamlit, RFM segmentation, Pareto analysis, and Market Basket Analysis to identify ~916K in revenue growth opportunity and generate next-best product recommendations through an interactive business application.
- **Personalization Engine for Content Optimization ([GitHub](#)):** Built a machine learning personalization engine using K-Means clustering and logistic regression, improving click prediction AUC from 0.57 to 0.69 (21%) through customer segmentation.
- **Humana-Mays Healthcare Analytics Case Competition (2019):** Developed predictive models for long-term opioid risk using healthcare claims data, achieving AUC 0.89 and 81% accuracy. Evaluated Logistic Regression, LASSO, and Random Forest models; ranked Top 50 among 450 teams nationally.
