

PAROMITA DAS

DATA SCIENCE & ADVANCED ANALYTICS | MACHINE LEARNING & AI | BUSINESS STRATEGY

Mount Laurel, NJ | Relocating to Greater Boston, MA | (419) 212-5299 | dasparomita1984@gmail.com | [linkedin.com/in/paromita-das](https://www.linkedin.com/in/paromita-das) | github.com/romy0806 | U.S. Permanent Resident

PROFESSIONAL SUMMARY

Data science and advanced analytics leader with 10+ years of experience across consumer products, digital media, aviation, consulting, and technology-driven organizations. Designs scalable analytics systems, measurement frameworks, predictive models, and AI-enabled workflows that improve customer outcomes, streamline processes, identify revenue opportunities, and deliver measurable cost savings. Combines hands-on Python, SQL, Tableau, and Power BI expertise with the ability to translate business challenges into analytical use cases, model requirements, validation plans, and executive recommendations. Proven cross-functional leader partnering with business stakeholders, data scientists, data engineers, and BI teams to deliver solutions from requirements through adoption.

EDUCATION & PROFESSIONAL DEVELOPMENT

MS, Business Analytics — University of Tulsa, 2019 | PGDM/MBA, Finance — IFIM Business School, 2009 | Bachelor of Science, Biotechnology — Bangalore University, 2006

Professional Development: Generative AI Workflow Automation • Prompt Engineering • Python for Data Science • SQL for Data Science • Project Management

CORE EXPERTISE

Advanced Analytics KPI frameworks • Forecasting • Experimentation • Segmentation • Cohort analysis • Data storytelling	Data Science & AI Python • SQL • R • Jupyter Notebook • Predictive modeling • Regression • Random Forest • K-Means • NLP • Generative AI/LLMs • LangChain	Product & Customer Analytics Customer journeys • Personalization • Funnel analysis • Conversion • Retention • LTV • Recommendations
Marketing & Media Analytics Campaign measurement • Paid media • Search • Social • Email/newsletter • Adobe Analytics • GA4	Data Products & Platforms Tableau • Power BI • Streamlit • GitHub • VS Code • AI/analytics prototyping • Data migrations • ETL concepts • Snowflake/Databricks familiarity	Analytics Leadership Business strategy • Executive communication • Requirements translation • QA • Team leadership • Mentoring

PROFESSIONAL EXPERIENCE

Consumer Reports | Yonkers, NY

Oct 2019 – Present

Senior Manager / Manager, Business Analysis

- Serve as a strategic analytics partner across Marketing, Product, Editorial, Membership, Licensing, Communications, Data Science, and Data Engineering, translating business challenges into analytics use cases, KPI frameworks, data and model requirements, success criteria, validation plans, and actionable recommendations.
- Manage global analytics consultants and partner with Data Engineering and Business Intelligence teams on data migrations, data validation, reporting automation, and scalable analytics delivery; design and develop dynamic Tableau solutions spanning 200+ product categories, social media, and the CR Ratings app.
- Led analytical design and executive reporting for a year-long, \$3M online video and YouTube campaign, connecting media delivery, audience behavior, and downstream customer outcomes to guide optimization and investment decisions.
- Serve as the analytics Subject Matter Expert for digital-product optimization, defining measurement approaches and ensuring methodologically sound data identification, A/B and test/control design, analysis, validation, and reporting across paywall, funnel, and member-engagement initiatives.
- Lead analytics for personalization initiatives using customer journey analysis, audience segmentation, behavioral cohorts, predictive modeling, and experimentation; designed and evaluated a tailored non-member homepage test that increased site conversion by 12%.
- Apply NLP and text analytics to app reviews and customer feedback, transforming unstructured data into issue themes, sentiment measures, and product-prioritization recommendations across the customer journey.
- Support analytics for Ask CR, a member-exclusive AI chat experience, defining product KPIs and analyzing adoption, usage behavior, and customer journeys to guide product optimization and strengthen member engagement.

- Design AI-enabled workflows that synthesize first-party performance data and third-party competitive intelligence to flag category gaps, surface growth opportunities, and automate recurring reporting—reducing effort by approximately 40% while maintaining human review, data validation, and governance controls.
- Supported the launch and growth of CR Recommended licensing and new consumer initiatives through measurement frameworks, customer insights, and cross-functional analytics; received the 2022 Smashing Success Award for analytics leadership supporting CR Recommended.

American Airlines | Tulsa, OK

May 2019 – Aug 2019

Supply Chain Analytics Intern

- Developed a SQL- and Tableau-based supplier performance scorecard for the Procurement team, ranking suppliers at the engine-part and purchase-order level using quality, defect rate, delivery lead time, price, and fulfillment metrics; built longitudinal views to flag deteriorating performance and inform sourcing, supplier selection, and cost-saving decisions.
- Analyzed five years of purchasing, demand, lead-time, cost, and supplier-performance data to compare Inventory-to-Order and Continuous Review replenishment policies for high-value aircraft engine turbine components; recommended the Continuous Review approach, delivering approximately \$500K in inventory cost savings and earning the 2019 Above & Beyond Award.

Analytics, BI, Data, Marketing Strategist, Process, Tech | St. Louis, MO

May 2019 – Aug 2019

Independent Consultant (Pro Bono)

- Developed market intelligence frameworks to help local business clients track market signals, competitor activity, market share, and emerging trends, while using SEO analysis and social media format testing to identify digital growth opportunities.

Time Inc. India | Bangalore, India

Sep 2010 – Jun 2015

Assistant Manager / Senior Analyst / Analyst

- Promoted from Analyst to Assistant Manager within five years; led digital, audience, and marketing analytics across 17 media brands reaching more than 30 million monthly users, including web, tablet, and mobile products.
- Partnered with U.S.-based Editorial, Marketing, Product, Audience Development, Sales, and senior leaders across time zones, translating SEM/SEO, social, affiliate, paid-traffic, newsletter/email, referral, and onsite data into acquisition, engagement, retention, and monetization recommendations.
- Led recurring search and social media analytics, identifying traffic drivers, content opportunities, channel trends, and best practices that informed editorial programming, audience-development initiatives, and advertising-sales strategy.
- Analyzed campaign, content, and product performance using Adobe Analytics, Comscore, Nielsen, Hitwise, Hootsuite, Facebook Analytics, and channel data; developed repeatable analytical workflows, KPI readouts, and executive recommendations.
- Delivered consumer research, audience segmentation, and test-and-learn insights to inform new digital products, digital events, content formats, and customer experiences across web and mobile properties.
- Established Time Inc. India's first Analytics QA function, developing enterprise standards, validation checklists, documentation, and training that improved the accuracy and consistency of reporting supporting a multimillion-dollar digital advertising business.
- Managed and mentored a team of four analysts delivering audience and customer insights that informed acquisition, engagement, retention, and lifecycle marketing strategies across digital brands.

Tata Consultancy Services – Unilever | Bangalore, India

Jan 2009 – Aug 2010

Senior Process Associate

- Analyzed U.S. point-of-sale and Nielsen data to evaluate consumer, brand, category, pricing, promotion, and market performance; delivered insights for commercial stakeholders.
- Served as an analytics SME, training and mentoring analysts and strengthening QA and knowledge-transfer practices; received the 2009 Star Performer Award.

SELECTED DATA SCIENCE & AI PROJECTS

- Executive Analytics Intelligence | [GitHub](#): Developed a Python/Streamlit AI decision-support application using OpenAI and LangChain to consolidate cross-functional KPIs, perform MoM/YoY/YTD trend analysis, and generate role-specific executive briefings.
- Customer Growth Intelligence & Recommendation Engine | [GitHub](#): Built a Python/Streamlit analytics application using Pandas, RFM segmentation, Pareto analysis, and Apriori market-basket analysis to identify approximately £916K in revenue opportunity and generate next-best-product recommendations.
- Personalization Engine for Content Optimization | [GitHub](#): Performed feature engineering, K-Means segmentation, and logistic-regression modeling to improve Microsoft News click-prediction AUC from 0.57 to 0.69 (21%), enabling more relevant content recommendations.
- Healthcare Claims – Opioid Risk Prediction | Case Study: Engineered features and evaluated Logistic Regression, LASSO, and Random Forest models using healthcare claims data; achieved AUC 0.89 and 81% accuracy and ranked Top 50 among 450 teams in the Humana-Mays Healthcare Analytics Case Competition.
